- Transcripts
- Curriculum vitae
- Any additional info

INTERVIEWS

2:1, 25-min
Individual interview

OFFERS

Admissions are offered on a rolling basis February through June.

* Highly recommended, but not required

HELPFUL TIPS

FOR APPLYING TO THE

MCA Program

1 UNDERSTAND WHY YOU WANT TO APPLY

Take time to familiarize yourself with the components of the program. Consider what aspects of the program are of interest and can help you achieve your long-term goals.

2

EXAMINE YOUR STRENGTHS

Consider your academic and extra-curricular successes. Recount the skills you've gained and experiences you've had and think about how those attributes can contribute to your success as a graduate student.

Take this time to also reflect on opportunities for improvement and consider how this master's program could help you grow in the areas you identify.

3 SEEK OUT RESOURCES

Ask for advice from academic and/or pre-health advisors about connecting your aspirations to application materials. Utilize your institution's career center for assistance with crafting and editing your personal statement.

4 CRAFT YOUR STATEMENT

Use the application process as an opportunity to share who you are, why the MCA is right for you, and what your goals are following this program. Use descriptive language and detail in your application to show your interest in the program. Make sure your application is free of typos and grammatical errors!

5 FOCUS YOUR NARRATIVE

Note that this is not an application for medical, dental, or any other professional program.

Your application should reflect interest in the MCA graduate program specifically.

Avoid submitting the same narrative as other applications to ensure your intentions are clear.

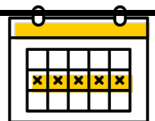

6 SELECT THE RIGHT RECOMMENDERS

Select a breadth of individuals with whom you have known and interacted who can comment on your skills, attitudes, and characteristics that support your application to the program. Tell them why you want to attend the MCA program and give them at least three to four weeks to complete your letter.

7 GIVE YOURSELF TIME

Take the time you need to craft your story, collect your materials, and reach out to your references.

Don't forget to contact the program if you have any questions throughout the application process!
