

Interdisciplinary Graduate Program in Molecular Medicine

Fall 2017 Workshop & Seminar Series

*“SOXcessfully building and preserving
a healthy skeleton -
SOX transcription factors critically
control musculoskeletal cell
differentiation and fate decisions”*

Thursday, Nov. 9, 2017/4:00 p.m./1289 CBRB

Individuals with disabilities are encouraged to attend all University of Iowa-sponsored events. If you are a person with a disability who requires an accommodation in order to participate in this program, please contact the Molecular Medicine Program office in advance at 319-335-7748.

Véronique Lefebvre, Ph.D.

Professor

Cleveland Clinic Lerner Research Institute

**co-sponsored by The Department of Anatomy &
Cell Biology**
