# Science Courses Required for BA and BS Degrees in Biochemistry and Molecular Biology

The following science coursework is required for a bachelor's degree in Biochemistry and Molecular Biology. Additional specific requirements for BA and BS degrees are indicated at right.

	Required Courses	Total s.h.	BA Total	BS Total
			s.h.	s.h.
Required Cou	urses for a Bachelor's Degree in Biochemistry and Molecular Biology			
Biochemistry	Biochemistry & Molecular Biology I (BMB 3120) and II (BMB 3130) and Experimental Biochemistry (BMB 3140)	8		
Biology	Foundations of Biology (BIOL 1411) and Diversity of Form and Function (BIOL 1412)	8		
Chemistry	Principles of Chemistry I (CHEM 1110) and II (CHEM 1120)	8		
Organic Chemistry	Organic Chemistry I (CHEM 2210) or Organic Chemistry II for Majors (CHEM 2230)	3		
	Organic Chemistry II (CHEM 2220) or Organic Chemistry II for Majors (CHEM 2240)	3		
	Organic Chemistry Laboratory (CHEM 2410) or Organic Chemistry II for Majors (CHEM 2420)	3		
Mathematics	Calculus I (MATH 1850) or Engineering Mathematics I: Single Variable Calculus (MATH 1550) or Calculus for the Biological Sciences (MATH 1460)	4		
	Calculus II (MATH 1860) or Engineering Mathematics II: Multivariable Calculus (MATH 1560) or Biostatistics (STAT 3510) or Introduction to Biostatistics (BIOS 4120)	3-4		
Physics	College Physics I (PHYS 1511) or Introductory Physics I (PHYS 1611)	4		
	College Physics II (PHYS 1512) or Introductory Physics II (PHYS 1612)	4		
Additional Co	urse Requirements Specific for BA and BS Degrees	-1	I	·
Advanced Biochemistry	Biophysics and Advanced Biochemistry (BMB 4240)		3	3
Advanced Chemistry	Principles of Physical Chemistry (CHEM 4430) or Chemical Thermodynamics I (CHEM 4431) or Quantum Mechanics & Chemical Kinetics (CHEM 4432)	-		3
Advanced Science Electives	Many courses satisfy this requirement (see examples on page 7)	-	6	9
Research or Advanced labs	Advanced Undergraduate Biochemistry Research (BMB 4999) <b>or</b> Advanced Laboratory Courses (see page 7)	-	-	6
Research Seminar	Development of Senior Research Project (BMB 3150) is a prerequisite for BMB 4999.		-	2*

\*BMB 3150 is required for students taking BMB 4999 but not required for BS students taking advanced lab courses.

The Bachelor of Arts with a major in Biochemistry and Molecular Biology requires a minimum of 120 s.h., including 58 s.h. of work for the major. The Bachelor of Science with a major in Biochemistry and Molecular Biology requires a minimum of 120 s.h., including 70-72 s.h. of work for the major. They also must complete the College of Liberal Arts and Sciences General Education Program. <u>(http://clas.uiowa.edu/students/students-graduation-requirements/general-education-program-requirements)</u>

## **Advanced Biochemistry-Chemistry Choices**

### BA and BS majors need to complete:

BMB 4240 Principles and experimental approaches used to student macromolecular structure, stability, and function; ligand binding and macromolecular interactions; enzyme kinetics and mechanisms; x-ray crystallography and NMR spectroscopy; single molecule and other biophysical approaches. *Prerequisite courses: BMB:3120 with a minimum grade of C- and BMB:3130 with a minimum grade of C-. Requirements: One year of biochemistry. Recommendations: Physical Chemistry course and one semester of calculus.* 

#### BS majors also need any one of these courses:

CHEM 4430 Principles of Physical Chemistry (Kinetics, transport properties, elementary thermodynamics, and selected topics in quantum mechanics and spectroscopy; emphasis on application of chemistry to areas of science including health and biosciences, environmental sciences, and related areas.)

Requirements: CHEM:1120 and MATH:1460 or MATH:1850 and PHYS:1512 or PHYS:1612.

- CHEM 4431 Chemical Thermyodynamics (Chemical thermodynamics and its application to chemical equilibrium, phase changes and chemical equilibria; ideal and real gases; kinetic theory; surface absorption and electrochemistry; thermodynamics.) *Requirements: CHEM:1120 and MATH:1560 or MATH:1860 and PHYS:1512 or PHYS:1612.*
- CHEM 4432 Quantum Mechanics & Chemical Kinetics (Quantum mechanics and its application to atomic and molecular structure; determination of structure and bonding by various spectroscopic methods; chemical kinetics.) Requirements: CHEM:1120 and MATH:1560 or MATH:1860 and PHYS:1512 or PHYS:1612.

### Examples of Advanced Science Electives accepted for BA and BS Degrees in Biochemistry and Molecular Biology

The requirement for advanced science electives is intended to help students expand their education by pursuing courses outside the standard Biochemistry and Molecular Biology (BMB) undergraduate curriculum. The requirement usually is fulfilled by taking classes that are 3000-level or higher (though some lower-level classes may be acceptable). Independent study and research credits do NOT count toward this requirement.

Research or Advanced Labs (BS degree only): The BS degree in BMB requires six semester hours of either BMB 4999 (Advanced Undergraduate Biochemistry Research) or advanced laboratory courses. Research credit taken in other science departments can also count for this requirement (subject to approval by a BMB advisor). Only 6 s.h. of BMB 4999 can count toward the requirements for the BS degree in BMB.

Examples of Advanced Science Electives are listed below<sup>\*</sup>. *Many* other courses may be taken; students should check with their advisor about whether or not a specific course not listed below will fulfill this requirement. It may be necessary for the student to obtain a syllabus or other information from the instructor before the advisor can make this decision.

		# S.H.	When Offered			# S.H.	When Offered
Anatomy and Cell Biology				CHEM 3430	Analytical Measurements	3	Spr
