2. Any faculty members with **joint or secondary appointments in another department/college** who are being considered for promotion in the College of Medicine must be reviewed by the secondary department(s) as well. A letter from the secondary department chair(s) is to be included in the College of Medicine promotion packet. The process for review in the secondary department(s) will be determined based on the agreement signed at the time of the appointment. The process will be either a full review by the secondary department and College of the materials provided by the primary department, or a faculty vote and letter of support from the secondary department to be included in the promotion dossier. **It is the responsibility of the primary department to make the promotion dossier available to the secondary department(s).**
3. The **final faculty vote** on each candidate for promotion should occur after the dossier, including external letters, is complete.
4. Candidates must be notified in writing at the following points in the process:
- Candidates must be provided a complete list of suggested reviewers before the final decision is made on who shall receive letters of request and may submit in writing any objection to a listed reviewer that the candidate feels may be unfairly biased.

- The candidate will receive copies of all internal peer evaluations of their teaching, scholarship and service that have been entered into the appropriate sections of the promotion record and will be given 10 working days to submit corrections of errors in those evaluations.
- The candidate will receive a copy of the Departmental Consulting Group's recorded vote and summary report that has been entered into the appropriate sections of the promotion record and will be given 10 working days to submit corrections of errors in that document.
- If the recommendation of the DEO to Dean is negative, the faculty member has 10 working days to access the promotion record and to submit corrections of errors in that letter.

NOTE: Any identifiable reference to external reviewers contained in these documents must be redacted before sharing with the candidate.

5. If the faculty member wishes to review his/her file, at any time during the review process, please contact the Office of Faculty Affairs and Development at 5-8067 to verify what the procedures allow.
