**EPIC Efficiency Tips** (Alison Pauley MSN, RN/Physician Informatics Officers (PIOs))
This session will work best if you BRING YOUR LAPTOP
Learn how to become more efficient in Epic.
- Find out how minor changes in workflow can give you minutes to hours back in your day.
- Discover how to use efficiency data (Provider Efficiency Profile [PEP] scores and Signal reports) to prevent burn out.
- Update your personal system in our live Epic environment during the session.
- InBasket Management
  - Chart Review
  - Documentation and Order Tools
- Explore personalization settings within Epic that work for you instead of against you.
- Determine what efficiency tips you can take back to your clinical setting to optimize workflows and still provide quality patient-centered care.
- Learn how to contact members of the Clinical Informatics team or your department PIO for personal or small group training.
- Learn how to register for a Thrive course to add even more efficiency tips into your daily practice.

**Speaking with Confidence** (Paul Casella, MFA, Office of Faculty Affairs and Development)
Course reviews how adults learn as a means to examine effective delivery techniques you can use to engage scientific and clinical peer audiences. It will provide practical information on how to deliver powerful oral presentations in the classroom, conference room, auditorium, and at regional or national meetings, as well as in poster sessions and during informal conversations with colleagues and potential collaborators.
Session includes discussion of voice, inflection, body language, techniques to stimulate interest and involvement, and strategies to help facilitate audience recall of the message. Session also addresses how to prepare for a presentation, how to manage anxiety, and how to design and use visual aids effectively.

**Sparking Your Creative Potential** (Cathleen Clerkin, PhD, Center for Creative Leadership)
As modern technologies make it easier to acquire information, the ability to create and innovate have become some of the most universally admired and sought after skill sets. And yet, many people are uncomfortable with the ideas of creativity and innovation (e.g. ‘I’m just not creative’ ‘What does innovation even mean?’) If this sounds familiar, you’re not alone! In this interactive workshop, we will separate fact from fiction when it comes to creativity and innovation, and demystify these topics by breaking them down into clear and actionable steps that you can take to spark your own creative potential.
As a participant, you will:
- Learn the definitions, cognitive processes, and key differences between creativity and innovation.
- Discover how you can booster your own creativity and lead group innovation efforts.
- Apply your new knowledge to your own creativity/innovation challenge and take home simple tools that will help you leverage your creativity.

**Managing Conflict** (Cynthia Joyce, PhD, University of Iowa Ombudsperson)
Interactive session on effective conflict management for healthcare providers. In small groups, participants will discuss how best to handle typical conflict scenarios faculty might face in the moment and impact of different conflict styles and emotional intelligence. Effects of the history of conflicts, power dynamics, and different communication styles will be discussed. Participants will then revisit the scenarios and develop a plan for follow-up discussions of the conflicts using a roadmap designed to guide difficult conversations.

**Money at Work: Foundations of Investing** (Bill Thorne, TIAA)
- Learn about types of investments, risk tolerance, asset allocation and why it’s important to have a healthy mix of investments.
- Learn principles governing saving and investing. Become aware of risk tolerance and how it can be affected by time horizon.
- Develop action steps to begin evaluating which investments may be right for you.
