

Objective	Assessment	Teaching/Learning Activity	Corresponding Collegiate Objective(s)
Interpersonal and Communication Skills			
Develop proficiency in writing inpatient notes particularly focused on post-surgical patient cares and considerations	Clinical evaluation form (CEF), direct observation	Clinical Care	ICS03
Medical Knowledge			
Compare and contrast the diagnosis and treatment of common otolaryngology problems in pediatric and adult patients	Clerkship exam	RCE, Independent learning	MK03
Expand knowledge base for the differential diagnosis and evaluation of common head and neck symptoms/complaints seen in primary care	Clerkship exam	Independent learning	MK03
Recall the indications for common ENT procedures: Myringotomy and tube placement; Tonsillectomy and adenoidectomy	Clerkship exam	Independent learning	MK03, PC03
Compare and contrast complete and incomplete acute facial nerve paralysis and summarize common causes and medical/surgical treatment options	Clerkship exam	Independent learning	MK03, PC03
Recognize risk factors and common presenting symptoms of head and neck cancer	Clerkship exam	Large group session, independent learning	MK03
Explain the common causes of neck/thyroid masses in pediatric and adult patients, and recognize the importance of excluding the presence of a malignant process	Clerkship exam	RCE, large group session, independent learning	MK03, PC03
Practice-Based Learning and Improvement			
Expand knowledge base for the differential diagnosis and evaluation of common head and neck symptoms/complaints seen in primary care	Clerkship exam	Independent learning	PBL02, MK03
Patient Care			
Recognize complicated ear, nose, and throat disorders that require referral to an otolaryngologist for management	Clinical evaluation form (CEF), direct observation	Clinical care	PC03
Obtain an accurate and focused patient history, with attention to specific ENT and related systemic complaints	Clinical evaluation form (CEF), direct observation	Clinical care, history taking & communication skills assignment	PC01
Become proficient with performance of and presentation of the focused head and neck examination	Clinical evaluation form (CEF), direct observation	Clinical care, Physical examination assignment	PC01, ICS02
Recognize normal laryngeal, otologic and nasal anatomic landmarks. Differentiate normal vs abnormal tympanic membranes	Clinical evaluation form (CEF), direct observation	Clinical Care, independent learning	MK03, MK02, PC02
Recognize and address quality of life issues that affect patients with head and neck disorder: Speech, hearing, swallowing, balance, pain, sleep disturbances	Clinical evaluation form (CEF), direct observation	Clinical Care, independent learning, large group session	PC03, MK03
Outline the diagnostic uses and how to perform the following common procedures: Flexible laryngoscopy, audiogram evaluation, ear microscopy	Clinical evaluation form (CEF), direct observation	Clinical care, RCE	PC03, MK03

examination			
Professionalism			
Demonstrate respect when communicating with patients and families regardless of characteristics, cultural background, and beliefs.	Clinical evaluation form (CEF), direct observation	Clinical Care	PR01
Systems-based Practice			
Acquire a general overview of the clinical scope of Otolaryngology-Head and Neck surgery	Clerkship exam	Clinical care, independent learning	SBP02
