

## **THIRD SEMESTER**

**MED:8221 Clinical and Professional Skills III:** advanced clinical reasoning skills gained through focused patient encounters and interactions with special patient populations; emphasis on students' ability to integrate and use concepts from the M.D. curricular strands that are required for cost-conscious, patient-centered, interdisciplinary care.

**MED:8222 Medicine and Society III:** health services organization and delivery, with emphasis on community dimensions of medical practice and patient safety.

**MED:8223 Mechanisms of Health and Disease IV:** abnormalities or disruptions leading to disease within and among mechanisms of immunology/inflammation, locomotion/integument, and neuropsychiatry.

**MED:8224 Mechanisms of Health and Disease Keystone:** transition from classroom instruction in MED:8124, MED:8133, MED:8134, and MED:8223 to clinical practice; foundational information from those courses approached from the perspective of common clinic encounters; diagnostic and management decisions about common important clinical problems using the foundational knowledge gained from those courses.
