MD students have the option to enroll in one semester-hour elective courses during fall and spring semesters of the pre-clinical curriculum. Course meetings occur during the noon hour or after 5pm, to avoid any conflicts with the required MD coursework. While there are multiple elective courses to consider, students should remember their primary focus is on their required pre-clinical coursework. Additional details will be emailed to students in August from the instructors, concerning course timelines and registration. Students are limited to a maximum of two elective courses per semester, unless otherwise approved by an OSAC Dean.
