

NIH would like all investigators using equipment support by S10 Instrumentation grants to cite the grants used to support the equipment. For the MR Research Facility we would like to request that all papers publishing data from the 3T scanner including the following acknowledgement in the paper:

This work was conducted on an MRI instrument funded by 1S10OD025025-01

For papers publishing data from the 7T scanner, the following acknowledgement should be included in the paper:

This work was conducted on an MRI instrument funded by 1S10RR028821-01

Thanks in advance for including these acknowledgements. This will help to ensure that we are competitive for future S10 grant applications.

Sincerely,
Vince
