

MRI Research Simulator

Available Now!

LOCATED AT L550A PBDB

- Behind GE 7T control room
- Access via ID badge reader

SCHEDULE TIME ONLINE JUST LIKE A RESEARCH SCAN

TRAIN SUBJECTS ON fMRI TASKS

- E-Prime
- Presentation
- Manipulandum
- Stimulus Computer

The MRI Simulator provides a realistic scanning experience to allow participant training in an environment less daunting than a real scanner.

Subjects are introduced to an authentic scanning environment, permitting them to gradually become accustomed to the scanning procedure and trained to minimize movements.

The simulator is **free** to use for all MRI Research Facility customers and can be reserved by going to:
