

Words of Advice

Your graduate training offers more than research skills and bench techniques! The skills you gain as a graduate student - managing multiple projects & undergraduate students, grant writing and editing - are all highly translatable to careers both inside and outside the academy and can serve as a basis for building your resume for non-academic careers.

Caitlin Runne, Ph.D.

**Chief Academic Officer
Science Interactive Group**

Science Interactive provides hands-on kits and digital curriculum for undergraduate students taking science lab courses online, allowing them to have a similar lab experience to students taking on-campus lab courses. As Chief Academic Officer, Dr. Runne heads a team of science educators and instructional designers in the development of kits and curriculum to cover a broad array of science topics. Additionally, she leads strategic planning around course offerings, as well as other tasks including sales and operational support, conference presentations, and partnership formation.

Completed PhD in Pharmacology: December 2013
