

Words of Advice

Learning HOW (the most valuable aspect of graduate school) to think has so many applications in the scientific and business worlds. Be open to opportunities and explore them with curiosity.

Eli Frakes, Ph.D.

**Scientific Director, US Medical Affairs
AbbVie**

Dr. Frakes is responsible for developing medical strategies to bridge AbbVie, patients, providers, and payers, translating science to brighten health and lives. These solutions could be medical education, scientific publications, or novel research.

Completed PhD in Pharmacology: May 2006
