

Words of Advice

It's not easy being a graduate student; some days can be tough. Know that the skills you are gaining as a PhD researcher will help you in the future regardless if you end up in academia, industry, or somewhere in-between. Plus, you'll always be able to make others laugh in the kitchen when you want to aliquot an ingredient for a commonly made dish.

Ryan Sheehy, Ph.D.

Assistant Dean of Basic Science Curriculum

Assistant Professor

Dept. of Medical Education, College of Medicine

University of Tennessee Health Science Center

Dr. Sheehy's primary responsibility is teaching pharmacology to medical students. He also serves as the Assistant Dean of the Basic Science curriculum for the MD program. He is a fellow within the Master of Education in the Health Professions program at the School of Education at Johns Hopkins University. Additionally, he is a published medical education researcher.

Completed PhD in Pharmacology: 2015
