

The Office of Consultation and Research in Medical Education presents **Skills for Educators 2024 Spring Workshops**

- **Clinical Teaching, January 19th, 4999 JPP**
Develop effective and efficient approaches to teaching in the context of patient care.
- **Using Technology for Learner Engagement, February 16th, 4999 JPP**
Many instructional technology tools are available that help us to increase student engagement in our lectures, small groups, or as part of longitudinal courses or rotations, etc., face-to-face or online! We will talk about how to choose the best tool for your needs and learn how to use a few of the common tools.
- **The Art and Science of Assessment in Health Professions Education, March 22nd, Eastroom**
This workshop will help you understand the purposes of assessment in learning, select the appropriate assessment type for the levels of learners' knowledge/skills being assessed, and utilize useful strategies for planning/evaluating your assessment practice in health professions education.
- **Educational Scholarship, April 19th, 4999 JPP**
This session will explore how to design and conduct research related to health professions education questions and innovations.
- **Teaching Clinical Reasoning, May 17th, 4999 JPP**
This session will focus on strategies and tools for assessing and teaching learners clinical/diagnostic reasoning.

8:30-11:30 AM

Individuals with disabilities are encouraged to attend all U of IA sponsored events. If you are a person with a disability who requires an accommodation in order to participate in this program, please contact the Office of Outreach & Engagement in advance at 319-335-0684.
