OBJECTIVES
The student will explain and describe the proper operative technique for dealing with trauma injury. The student must identify traumatic injuries and develop a management plan in order to surgically repair the injuries.

At the completion of this course the student will be able to demonstrate the following:

1. Increased self-efficacy in the management of traumatic injuries
2. Increased knowledge in the management of penetrating injuries
3. Ability to successfully and safely perform all operative procedures presented in the course

Target Audience:
4th and 5th year Surgical Residents, Trauma Fellows, General Surgeons and others who wish to obtain a better knowledge of identifying and managing advanced operative trauma cases.

CONTINUING MEDICAL EDUCATION
ACCREDITATION
The American College of Surgeons is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

CME CREDIT
The American College of Surgeons designates this educational activity for a maximum of 7.5 AMA PRA Category 1 Credits™. Physicians should only claim credit commensurate with the extent of their participation in the activity.

ADVANCED TRAUMA OPERATIVE MANAGEMENT®
Sponsored by the University of Iowa
Carver College of Medicine,
Department of Surgery

Everyone in a position to control the content of this educational activity will disclose to the CME provider and to attendees all relevant financial relationships with any commercial interest. They will also disclose if any pharmaceuticals or medical procedures and devices discussed are investigational or unapproved for use by the U.S. Food and Drug Administration (FDA).
About the Course

The Advanced Trauma Operative Management® Course was established in 1998 to enhance the interactive exchange of knowledge regarding operative procedures in the management of trauma. The ACS Committee on Trauma has approved this course. A course text and CD-Rom are provided to all participants. The course consists of six 30-minute lectures followed by a 3-hour lab session during which the student manages fourteen different injuries. The lab session is unique in that there is a 1:1 student to instructor ratio. At the conclusion of the course, the student is required to complete a post-course evaluation and a survey via the Internet.

ATOM® COURSE DATES FOR 2016

The ATOM® Course is held in the Department of Surgery, Acute Care Surgery Conference Room, 0091-Q RCP. The course begins promptly at 8:00 am and concludes by 4 pm. Due to the limited number of students (3) per course, early registration is encouraged. Hotel and transportation information is available upon request. Please indicate your first, second and third choices for course dates as some dates may already be filled.
